

December 1986

Bibliography on COLD REGIONS SCIENCE AND TECHNOLOGY

VOLUME 40, PART 2, 1986

Geza T. Thuronyi, Editor

NOTE / [4DA - 185 CH12].

This is a companion issue to Vol. 40, Pt. 1, The latter contains the full bibliographic citations referred to in the author and subject indexes included in this issue. In the author index, principal and joint personal and corporate authors are listed along with the title, date, pagination, and language of the document and the accession number. The subject index is composed of four basic elements: 1) terms taken from a controlled vocabulary based on the *Thesaurus of Engineering and Scientific Terms* (LEX-EJC), 2) free terms added as needed, 3) geographic names, generally entered under countries, 4) cross references suggesting additional appropriate terms. The terms are listed in a single alphabetical arrangement, along with title (original, translated, abridged, expanded, or supplied), principal author, date, pagination, and language of pertinent documents, and their accession numbers.

This publication is available from the National Technical Information Service, Springfield, Virginia 22151. When ordering, both Parts 1 and 2 should be included, as they are complementary.
